

RENOVUM RANGE — BIO-STIMULANT

Aequor

An elite seaweed & eXo concentrate that sinks the competition.

BIO-STIMULANT · YEAR-ROUND — 2026

Aequor

Seaweed & eXo Concentrate Bio-Stimulant

100% ASCOPHYLLUM NODOSUM + eXo

Aequor is built on a 100% organic *Ascophyllum nodosum* base — perhaps the most researched bio-stimulant on the planet, and widely recognised as the most efficacious seaweed for horticulture — then taken to an elite level with the addition of eXo.

It aids plant establishment, stimulates root growth, enhances flowering and fruiting, enriches soil microbial activity and increases tolerance to biotic and abiotic stress — carrying auxins, cytokinins, alginates, mannitol, phenolic and organic compounds and amino acids. The eXo addition means rates are typically half of what competitors require.

AT A GLANCE

BASE	100% organic <i>Ascophyllum nodosum</i> , supercharged with eXo
RATE	Foliar 3 - 5 L / 1000 L · Fertigation 5 L / ha · min. 14-day interval
SIZES	20 L · 200 L · 1000 L IBC
BEST FOR	Year-round — root health, use efficiency, resilience & flowering

PROVEN RESULT — up to 50% lower usage rate versus competitors, for a premium bio-stimulant that promotes general vigour and resistance to abiotic and biotic stress.
