eXo
ENHANCED

What is eXo?

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects. The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve a variety of plant metabolism parameters. eXo is a next generation chelator designed for superb results.

Rates and Guidelines:

Fertigation: During generative stage add Floralis A, B & C in equal parts to fresh water @ 1mL to 5mL each per Litre and 5.5-6.2 pH (EC = 0.5-2.4 mS/cm).

Warning: May cause skin irritation. May cause eye irritation. Read directions before use. Keep out of reach of children. Agitation may be required prior to application.

Typical Analysis

Total N: _____ 5.38% w/v
N-NH₄ _____ 0.23% w/v
N-NO₃ _____ 5.15% w/v
K _____ 1.92% w/v
(K₂O) _____ 2.31% w/v
Ca _____ 4.00% w/v
Mg _____ 1.17% w/v

Floralis

What is Floralis?

Floralis is an elite generative fertiliser for flowering plants. Floralis is designed for use in run to waste substrate or hydroponic systems, but can be utilised in soil systems as a root zone fertiliser as well. Floralis' optimised elemental ratios, combined with superior natural complexing (eXo), provide your flowering plants with the nutrition required to produce the highest quality yields and most vibrant flowers. For best results use with Renovum Folium, Fullsterkur & Umbra.
