

RENOVUM RANGE — VEGETATIVE

Vegetative Fertilisers

*Boost canopy, roots and early vigour for stronger, faster,
higher-yielding crops.*

UMBRA · EXIMIUS · LAURUS · VALENS — 2026

Umbra

Professional Vegetative Booster

ANALYSIS 5-0-5-0

An elite vegetative fertiliser for all cropping systems, Umbra improves planting resilience and vegetative vigour in fast-growing plants — building strong canopies and root masses with high yield potential. It gives juvenile seedlings and clones the specific nutrition to encourage prolific early root generation and canopy growth.

Young fast-growing plants often favour roots over canopy and react badly to overfeeding. By driving superior uptake through eXo, Umbra shortens time to establishment — creating higher-vigour crops that finish faster and yield higher.

AT A GLANCE

ANALYSIS	Total N 4.82% · K 4.60% (K ₂ O 5.54%) · Ca 2.28% · Mg 1.08% w/v
RATE	Foliar 1 - 2.2 L / 1000 L · Fertigation 1.4 - 6.8 L / ha
SIZES	20 L · 200 L · 1000 L IBC
BEST FOR	Early root generation & canopy build

Eximius

Professional Vegetative Booster

ANALYSIS 6-0-7-0

A premium vegetative fertiliser expertly crafted to build phenomenal canopies. Through ideally balanced elemental ratios and superior natural complexing (eXo), Eximius increases crown diameter, leaf area and total root mass in all crops.

Used to strongly establish seedlings and lift vegetative vigour, Eximius potentiates the crop for bumper yields — optimising innate immunity, mitigating stress responses and improving ease of growing while potentially lowering input costs.

AT A GLANCE

ANALYSIS	Total N 6.08% · K 7.10% · Ca 2.85% · Mg 1.00% w/v
RATE	Foliar 1.25 – 1.7 L / 1000 L · Fertigation 1.25 – 5.3 L / ha
SIZES	20 L · 200 L · 1000 L IBC
BEST FOR	Crown diameter, leaf area & root mass

Laurus

Professional Vegetative Booster

ANALYSIS 7-0-6-0

A premium vegetative fertiliser for professional growers. Formulated with optimised elemental ratios and superior natural complexing (eXo), Laurus delivers unrivalled uptake efficiency — creating impressive canopies filled with complex branching and high yield potential.

Laurus maximises plant height and node complexity, drives photosynthesis through enlarged leaf area and chlorophyll density, and promotes prolific root growth — with robust pest and disease resistance and superior durability against stress.

AT A GLANCE

ANALYSIS

Total N 6.51% · K 6.10% · Ca 2.85% · Mg 1.64% w/v

RATE

Foliar 1.35 – 1.75 L / 1000 L ·
Fertigation 1.35 – 5.5 L / ha

SIZES

20 L · 200 L · 1000 L IBC

BEST FOR

Height, node complexity &
photosynthesis

Valens

Professional Vegetative Booster

ANALYSIS 4-2-0-4

A premium vegetative fertiliser developed for all cropping systems, Valens provides the nutrition to stimulate strong vegetative growth and pruning recovery. Its eXo complexing molecules stabilise the ammonium nitrogen in its original form, significantly reducing nitrification and radically increasing efficiency over non-stabilised ammoniacal nitrogen.

Because the ammonium is preserved through natural complexing, there is no reduction in beneficial bacteria — unlike synthetic stabilisers, which often kill the surrounding micro-biome. Valens lifts vegetative vigour, root mass and innate immunity, so plants recover fast from prunes and resist stress.

AT A GLANCE

ANALYSIS	Total N 4.05% (all N-NH ₄) · P 1.99% · S 3.60% w/v
RATE	Foliar 1.6 – 2.2 L / 1000 L · Fertigation 1.6 – 6.75 L / ha
SIZES	20 L · 200 L · 1000 L IBC
BEST FOR	Pruning recovery & stabilised ammonium N
