

RENOVUM RANGE — CHELATION

eXo

A blend of natural chelators that get your nutrients where they need to go.

NATURAL CHELATION · SEASON ROUND — 2026

eXo

Superior Natural Chelation

ANALYSIS 0-0-0-0 · NATURAL CHELATORS

eXo is an exceedingly effective blend of vastly different classes of natural chelators, each with its own unique benefit, working in tandem for unparalleled efficacy. Its constituents are small, intermediate-strength chelators that hold ions in a neutrally charged state until they are absorbed through root or leaf, then release them cleanly to be used — no laborious metabolic breakdown, no phytotoxic residue.

Tank-mix eXo with the fertilisers you already use — particularly calcium and trace elements — to build on-farm complexes, instead of paying extra for branded chelated products. Save up to 25% versus branded products, with a better result for a cheaper cost.

AT A GLANCE

ANALYSIS	0-0-0-0 — natural chelators, no NPK
RATE	Foliar 2 - 5 L / 1000 L · Fertigation 5 - 10 L / ha
SIZES	20 L · 200 L · 1000 L IBC
BEST FOR	Season round with foliars — esp. calcium & trace elements

PROVEN RESULT — build on-farm complexes and save up to 25% versus branded chelated products, mixing exactly the ratio your crop needs.
