eXo
ENHANCED

What is eXo?

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects. The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve a variety of plant metabolism parameters. eXo is a next generation chelator designed for superb results.

Rates and Guidelines:

Foliar: During generative stage add Exurgo to fresh water @ 1.4mL to 1.85mL per Litre and 5.0-5.8 pH (EC = 0.6-0.8 mS/cm). Apply evenly to the point of runoff.

Fertigation: During generative stage add Exurgo to fresh water @ 1.1mL to 5.8mL per Litre and 5.3-5.8 pH (EC = 0.5-2.5 mS/cm).

Warning: May cause skin irritation. May cause eye irritation. Read directions before use. Keep out of reach of children. Agitation may be required prior to application.

Typical Analysis

Total-N	_____	5.83% w/v
N-NH ₄	_____	0.07% w/v
N-NO ₃	_____	5.76% w/v
K	_____	4.07% w/v
Ca	_____	6.06% w/v

Exurgo

What is Exurgo?

Exurgo is a professional grade generative booster designed to maximise fruit size, marketability and brix levels in Strawberry crops. Exurgo is specially formulated to overcome root zone calcium uptake issues during peak generative demand. Exurgo is a fit for purpose foliar strawberry fertiliser containing superior natural chelation (eXo), to enhance Calcium and Potassium uptake, optimising fruit size, morphology and sugar deposition. Exurgo is designed to be sprayed regularly throughout the entire generative period and is easily integrated into any existing fertiliser program.
