eXo
ENHANCED

What is eXo?

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects. The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve a variety of plant metabolism parameters. eXo is a next generation chelator designed for superb results.

Rates and Guidelines:

Foliar: During all growth stages add Renitor to fresh water @ 1mL to 1.4mL per Litre and 4.5-5.0 pH (EC = 0.6-0.8 mS/cm). Apply evenly to the point of runoff.

Fertigation: During all growth stages add Renitor to fresh water @ 1mL to 1.75mL per Litre and 4.5-5.3 pH (EC = 0.5-1.0 mS/cm).

Warning: May cause skin irritation. May cause eye irritation. Read directions before use. Keep out of reach of children. Agitation may be required prior to application.

Typical Analysis

Total-N _____ 8.18% w/v
N-NH₄ _____ 0.58% w/v
N-NO₃ _____ 7.60% w/v
Ca _____ 10.03% w/v

Renitor

What is Renitor?

Renitor is a first-class Calcium product designed to promote quality vegetative growth, diminish green fruit drop and improve shelf life in Blueberry crops. Specially formulated for use in both run to waste substrate or soil systems, Renitor is a highly versatile growth enhancer that can be used as an additive throughout the entire growing cycle. Renitor is designed to improve problematic Calcium uptake in Blueberries by employing superior natural chelation (eXo), improving both vegetative and generative growth parameters.
