eXo

ENHANCED

What is eXo?

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects. The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve a variety of plant metabolism parameters. eXo is a next generation chelator designed for superb results.

Rates and Guidelines:

Foliar: During all growth stages apply Aequor @ 3L to 5L per Hectare.

Fertigation: During all growth stages apply Aequor @ 3L to 5L per Hectare.

Warning: May cause skin irritation. May cause eye irritation. Read directions before use. Keep out of reach of children. Agitation may be required prior to application.
