eXo

Superior Natural Chelation

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects.

renovumag.com.au

The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve plant metabolism, enzymatic and hormonal activity, stress tolerance, leaf area, chlorophyll density, antioxidant accumulation and innate immunity. eXo is a next-generation chelator designed for superb results.

Rates and Guidelines:

Foliar: During all growth stages apply eXo in a final foliar fertiliser solution @ 150-250mL per 100m² .

Fertigation: During all growth stages add eXo to tank concentrate @ 2 Litres per 100 Litres.

- Non-phytotoxic
- Markedly improves uptake of foliar fertilisers
- Radically increases the internal translocation of low mobility elements
- Enhances root zone fertiliser uptake efficiency
- Promotes stabilisation of Nitrogen
- Strengthens plant resistance to environmental stressors
- Boosts innate immunity
- Natural – stimulates beneficial microbial activity
- Versatile – for use on all plants in any growth stage
