eXo
ENHANCED

What is eXo?

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects. The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve a variety of plant metabolism parameters. eXo is a next generation chelator designed for superb results.

Rates and Guidelines:

Foliar: During generative stage add Effloro to fresh water @ 2.8mL to 3.8mL per Litre and 5.0-5.8 pH (EC = 0.6-0.8 mS/cm). Apply evenly to the point of runoff.

Fertigation: During generative stage add Effloro to fresh water @ 2.5mL to 11.9mL per Litre and 5.2-5.6 pH (EC = 0.5-2.5 mS/cm).

Warning: May cause skin irritation. May cause eye irritation. Read directions before use. Keep out of reach of children. Agitation may be required prior to application.

Typical Analysis

Total-N	_____	0.42% w/v
N-NO ₃	_____	0.42% w/v
P	_____	2.13% w/v
K	_____	5.73% w/v
S	_____	0.81% w/v

Effloro

What is Effloro?

Effloro is a professional grade generative booster designed to maximise fruit size and brix levels in Rubus. Effloro improves yield by providing Rubus canes with the required nutrition to maintain premium fruit size during periods of peak generative demand. The superior natural complexing (eXo) contained in Effloro promotes optimal nutrient uptake, driving fruit sugar deposition and premium berry size in Rubus. Effloro is professionally designed to be utilised in substrate and soil cropping systems, and to integrate seamlessly into any existing
