eXo
ENHANCED

What is eXo?

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects. The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve a variety of plant metabolism parameters. eXo is a next generation chelator designed for superb results.

Rates and Guidelines:

Foliar: During vegetative stage add Laurus to fresh water @ 1.35mL to 1.75mL per Litre and 5.0-5.8 pH (EC = 0.6-0.8 mS/cm). Apply evenly to the point of runoff.

Fertigation: During vegetative stage add Laurus to fresh water @ 1.1mL to 5.5mL per Litre and 5.2-5.6 pH (EC = 0.5-2.5 mS/cm).

Warning: May cause skin irritation. May cause eye irritation. Read directions before use. Keep out of reach of children. Agitation may be required prior to application.

Typical Analysis

Total-N	_____	6.51% w/v
N-NH ₄	_____	0.16% w/v
N-NO ₃	_____	6.35% w/v
K	_____	6.10% w/v
Ca	_____	2.85% w/v
Mg	_____	1.64% w/v

Laurus

What is Laurus?

Laurus is a premium foliar vegetative fertiliser for professional Rubus growers. Formulated with optimised elemental ratios and superior complexing (eXo), Laurus is designed to provide an unrivalled uptake efficiency, creating impressive Rubus canopies filled with complex branching and high yield potential. Laurus maximises vegetative growth parameters, resulting in explosive growth and increased stress resistance. Laurus seamlessly integrates into all cropping systems and existing fertiliser regimes, and can be fertigated if so desired.
