## eXo

ENHANCED

### What is eXo?

eXo is an exceedingly effective ensemble of cutting-edge chelators, each with their own unique benefits that work in tandem to provide unparalleled efficacy. eXo is a new approach to chelation, utilising compounds which not only improve fertiliser uptake efficiency but also exert their own distinctive positive physiological effects. The compounds contained in eXo are small, intermediate strength chelators, capably holding ions in a neutrally charged state until absorbed through root or leaf apertures and can successfully improve a variety of plant metabolism parameters. eXo is a next generation chelator designed for superb results.

### Rates and Guidelines:

**Foliar:** 3 - 5L per 1000L of water. Minimum 14-day interval between applications.

**Fertigation:** 5L/ha. Minimum 14-day interval between applications.

**Warning:** May cause skin and eye irritation. Read directions before use. Keep out of reach of children. When mixing with other chemicals always perform a jar and leaf test first. Incompatible with Calcium. This product must be used strictly in accordance to the directions. The efficacy of the product may be influenced by environmental conditions and application procedures and no warranty, express or implied is offered.
